

Dear, Students attending General Physics Course!

Based on the most fundamental principle, physics as a basic science provides rational prospect of natural phenomena experienced. In order to acquire answers to essential questions, it is necessary that creative thoughts and practical problem solving ability are cultivated. For the purpose of developing these talents and realizing the interdisciplinary connection among the other natural sciences and engineering studies, we (Department of Physics, College of Science, Korea University) constitute GenPhy Course consisting of General Physics and General Physics Laboratory as the following:

Semester	Course No.	Course Name	College
Spring	PHYS151	General Physics I	Science, Engineering, Health Science
	PHYS161	General Physics Laboratory I	Science, Engineering, Health Science
	PHYS183	General Physics for Life Scientists	Life Sciences & Biotechnology
Fall	PHYS152	General Physics III	Science, Engineering, Health Science
	PHYS162	General Physics Laboratory II	Science, Engineering, Health Science

In order to complete education purpose, Chief Professor and lecturers in Office of General Physics as well as professors and lecturers/assistants in Department of Physics make every effort to implement perfect lecture contents and attain best education environment, so that students attending GENPHY Course are promoted to improve more scientific and creative intelligence through GENPHY Course lecture.

We request that students attending GENPHY Course try their best to be in accordance with education purpose. In addition, we desire that students attending GENPHY Course have the improved understanding of the physical phenomena based on GENPHY Course lecture and the increased ability to make a scientific solution in the field of major or general studies. All notices about General Physics and General Physics Laboratory are announced in KPOPE homepage. If students have questions about the administration work or study of GENPHY Course, we advice them to visit Office of General Physics or inquire of professors and lecturers/assistants without hesitation.

Thanks.
